

Product Management

Natural Suite's Natural Order includes an integrated Product Management System that enables more effective control of your products. With an immense variety of settings for the SKUs, it allows control on how these items are utilized through the entire product lifecycle. Our Product Management System enables control and tracking for all stages: product inception, product growth, product maturity and product decline.

Key Features

PERSONALIZATION SCHEMES

- Define *Personalization Schemes* to manage customization needs. *Personalization Schemes* allow: Setup fees, charges per letter, charges per Line, default values, lists of values to choose from, and more.
