

Warehouse Management

**NATURAL
SUITE**

Natural Suite's Natural Order includes an integrated Warehouse Management System (WMS) that allows optimization of warehouse functions. The flexible picking process allows your business to easily adapt to your unique customer demand requirements. It will effectively and efficiently direct personnel, helping to reduce time which in turn reduces cost. Increase accuracy by utilizing barcode scanners for picking/packing/shipping/receiving/movement. Our WMS is simple to connect to your favorite shipping carriers.
